## White Label: Cryptocurrency Exchange as a Service

Our White Label program will allow our B2B partners to run a crypto exchange under their brand name with almost zero investment in time and money. While they focus on the business and marketing, we will provide all the development, scalability and tight security of the platform.

The Limitlex Smart Exchange and all our White Label partners will share in the liquidity pool on the platform. All partners will thus provide high liquidity to their users from the beginning.

## The Limitlex Token: LMX

LMX is a utility token, based on ERC20 Token Standard. Use it to pay transaction fees at a hefty discount – even up to 55%!

White Label partners can also use LMX tokens to pay fees at significant discounts over the entire volume of their exchanges!
